Catalog No. 16

The Elgin National

Floor and Counter

Coffee Mills

This catalog supersedes all previous issues.
See our new designs from
Nos. 36 to 47.

The Elgin National Coffee Mill is like the
Elgin Watch.

Built on merit.

They are Perfect Mills.

Rapid Grinders.

Easy running.

Latest designs.

The demand for our mills is much greater
than ever before and beyond our expecta-
tions.

The Elgin National Coffee Mills are
unsurpassed for beauty and finish. In
appearance are graceful, attractive and pleas-
ing to the eye.

They are the highest Standard of excel-
lence; are strong and grind fast and uniform.

We wish to call special attention to our
new line of Mills Nos. 36 to 47.

They are the best Coffee Mills that can be

made, having all the latest improvements, and are the result of our 20 years experience in making Coffee Mills.

They will grind faster and run easier than any other mill made.

We still continue to use the "Empire" Grinders in Nos. 10 to 19 mills, as the universal satisfaction this style of grinder has given demonstrates their superiority.

All of our Mills are fitted with a Special Adjuster for regulating the grinding, (being entirely separate from the large wheels). This device is used on our mills only. They regulate for fine or coarse grinding while the Mill is running.

Our larger Mills are painted to suit customers, either Red, or Wine Color, handsomely decorated with Gold Bronze and Tube Colors.

The smaller Mills are finished in Red and Gold.

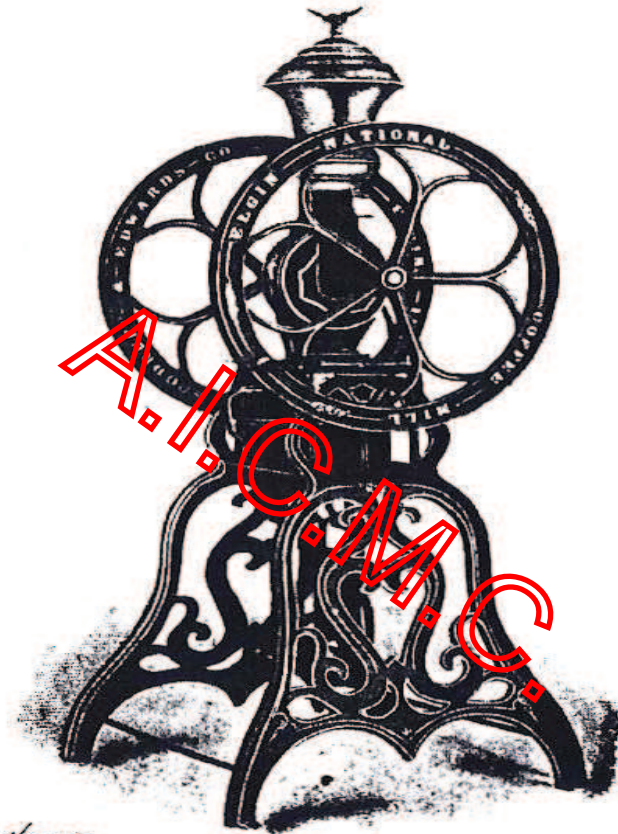

In selecting a Coffee Mill be sure to order one large enough.

The weights given in this Catalog are for the Mills crated ready for shipment.

We aim to keep Mills in stock at all times, in order to fill orders promptly.

ELGIN NATIONAL FLOOR MILL.
